CAREER OBJECTIVE

As a recent graduate in software engineering from Moringa School, I bring a robust programming foundation and a keen willingness to adapt, learn, and progress. I am actively seeking opportunities to apply my knowledge and contribute to innovative projects, all while enhancing my coding proficiency. My overarching objective is to establish a presence in the tech industry, where I can leverage my technical skills to develop exceptional applications. I aspire to engage with seasoned professionals, collaborating to craft efficient and inventive software solutions. To view my Portfolio follow this link **https://houstin0.github.io/Portfolio/**

PROJECTS

During my time at Moringa I have worked on some of my own projects and also collaborated with fellow developers on projects.

Link Loop

October 2023 – PRESENT

- Link loop is a social media web application designed to connect users to other users. It aims to provide a platform where users can connect, share moments, and explore a world of visual stories.

- I worked on the entire project.

Skill Hunter

August 2023 – PRESENT

- Skill Hunter is a comprehensive web application designed to be your ultimate companion in the job hunting journey.

- In the team I contributed to the search functionality and delete functionalities of the app

Recipe Manager and Meal_Planner CLI

September 2023 – PRESENT

- Recipe Manager and Meal Planner CLI is a command-line application designed to help you organize your recipes and plan for meals. With this tool, you can store, categorize, search for recipes, plan meals, and even generate shopping lists based on your meal plans. Whether you're a culinary enthusiast or just trying to simplify your meal planning, this CLI app has you covered.

- I worked on the entire project.

Myduka

November 2023 – PRESENT

- Myduka is an inventory app that is designed to help businesses in stock taking, generation and visualization of weekly, monthly and annual reports.

- I was responsible for making the back-end.
